

START ELIMINATING THE TERMITE COLONY ON DAY ONE.

To protect their homes from subterranean termites, homeowners have made the Sentricon® System the No. 1 brand.¹ Now, with Always Active™ technology, Sentricon begins the termite colony elimination process on Day One. Faster colony elimination equals faster peace-of-mind protection for you and your family.

INSPECT. PROTECT. CHECK.

1. Your property is thoroughly inspected for signs of termites.

2. Sentricon stations containing Recruit® HD termite bait are placed in the soil around your home.

3. Recruit HD immediately begins protecting your home against termites.

4. Your technician checks Sentricon stations as needed to protect against future infestations.

 **SENTRICON**[®]
WITH ALWAYS ACTIVE

ALWAYS READY TO PROTECT YOUR HOME.

The Sentricon® System with Always Active™ technology begins protecting your home against termites right away. Recruit® HD termite bait is placed in all stations around your home upon installation, making it immediately available to termites. This highly durable bait is specially design to remain in the soil for long periods of time. Termites prefer it over the wood in your home and actually find it even more palatable as it ages.

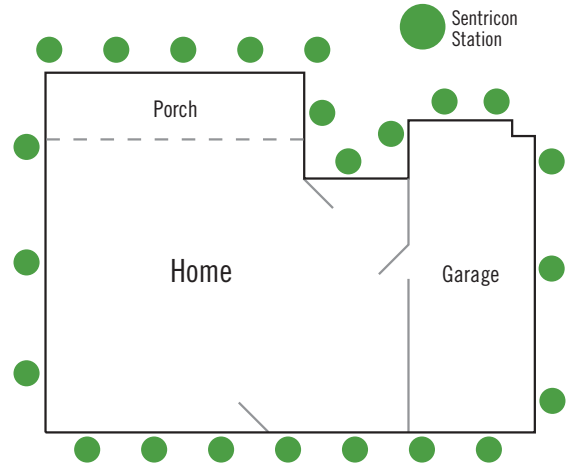

There is enough active ingredient in just one bait device to eliminate a typical termite colony, making Sentricon with Always Active the most effective termite treatment option available. Even after a colony has been eliminated, Sentricon with Always Active remains on guard, protecting your home from the threat of future invasions.

Sentricon with Always Active is also environmentally responsible. It uses just a small amount of active ingredient in each Recruit HD bait device, and the bait can be removed at any time. It works with a termite's biology and does not pose a threat to humans, pets or the environment.

Only the industry's best are selected to install and service the Sentricon System. These Certified Sentricon Specialists™ undergo extensive training and utilize state-of-the-art data management tools to ensure your home is properly inspected and protected.

Proven results and professional service are what have made Sentricon the No. 1 customer preferred termite treatment option.¹

SENTRICON STATIONS ARE PLACED IN THE SOIL AROUND YOUR HOME.
